			ART UNIT 2623	PAPER NUMBER
			NOTIFICATION DATE 01/23/2008	DELIVERY MODE ELECTRONIC

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

DCIPDocket@arentfox.com  
IPMatters@arentfox.com  
Patent\_Mail@arentfox.com

## Office Action Summary

**Application No.**

09/344,492

**Applicant(s)**

HENDRICKS ET AL.

**Examiner**

Jason P. Salce

**Art Unit**

2623

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 13 November 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-4,6-10,12-17,25-28,30-34,36-41,50 and 51 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-4,6-10,12-17,25-28,30-34,36-41,50 and 51 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

### Attachment(s)

| 2) <input type="checkbox"/> Notice of Draftsperson's Patent Drawing Review (PTO-948)   | Paper No(s)/Mail Date: _____                                      |
| 3) <input checked="" type="checkbox"/> Information Disclosure Statement(s) (PTO/SB/08) | 5) <input type="checkbox"/> Notice of Informal Patent Application |
| Paper No(s)/Mail Date <u>8/07 and 10/07</u> .  | 6) <input type="checkbox"/> Other: _____                          |

## DETAILED ACTION

### *Response to Arguments*

Applicant's arguments filed 11/13/2007 have been fully considered but they are not persuasive. Applicant has amended the claims to further define the features of Applicant's invention. The examiner notes that the amended claims have introduced subject matter that is not supported in Applicant's specification under U.S.C. 112 1<sup>st</sup> Paragraph and is further deemed indefinite under U.S.C. 112 2<sup>nd</sup> Paragraph.

Further, in view of the 112 rejections, the examiner will reject the claims as written based on what Applicant's specification has supported.

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4, 6-10, 12-17, 28, 30-34, 36-41 and 50-51 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Referring to dependent claim 28 and independent claims 1, 10, 12, 17, 34, 36, 41 and 50-51, the claims state, "saving a first restricted version of the electronic book

**in the library unit including the original format of the electronic book**” and **“creating a second unrestricted version of the electronic book by deleting predetermined content**”. The examiner notes that there is no support in the Applicant’s specification for these claim limitations. On Page 56 of Applicant’s specification teaches that an unrestricted version contains the original copy and a restricted version contains deleted portions (as opposed to the recited claim limitations).

Referring to claims 50-51, the claims states displaying a screen with an index and further displaying within the screen (that includes the index) a portion of the electronic book where portions of the portion of the electronic book can be selected by the user to restrict identified content. The examiner notes that the specification fails to support displaying an index and a portion of an electronic book on the same screen, wherein the user can restrict access to identified content.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 12, 17, 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Referring to claim 12, the claim states, **“restricting access by the potential user to the electronic books”**. The claim limitation is indefinite because the examiner

cannot determine if the potential user restricts access by specifically setting the restriction or simply selects the option to view a restricted list of books.

Referring to claim 17, the claim states, "**restricting access by the other users to the content of the electronic book**". The claim limitation is indefinite because the examiner cannot determine if the potential user restricts access by specifically setting the restriction or simply selects the option to view a restricted list of books.

Referring to claim 36, the claim states, "**a restricting module that restricts access by each other user to the electronic books**". The claim limitation is indefinite because the examiner cannot determine if the each other user restricts access by specifically setting the restriction or simply selects the option to view a restricted list of books.

Referring to claim 25, the claim states, "**and if the electronic book contains at least one restriction, on whether the restriction applies to the identified user, wherein the restriction is stored in a header file of the electronic book**". The claim is indefinite because the "if" statement has no "then" clause. The examiner cannot determine the result of the "if" clause.

Claim 25 further recites the limitation "the second unrestricted version". There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2, 4, 6-10, 17, 23-26, 28, 30-34, 41 and 47-48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Handelman et al. (U.S. Patent 6,298,441) in view of Duga et al. (U.S. Patent No. 6,195,667) in further view of Knauff et al. (U.S. Patent No. 6,654,754) in further view of Ginter et al. (U.S. Patent No. 5,892,900).

Referring to claim 1, Handelman discloses restricting access to electronic books displayed on a viewer (see Figure 12 and Column 7, Line 66 through Column 8, Line 11).

Handelman also discloses displaying an identification of an electronic book on a viewer (see screen 425 in Figure 12 and Column 2, Lines 40-44 and Column 16, Lines 45-56 and Column 17, Lines 16-31).

Handelman also discloses receiving identification information from a user (see Column 15, Lines 41-43), wherein the identification of an electronic book is displayed based on the identification information from the user (see Column 16, Lines 18-31).

Handelman also discloses receiving information on whether the electronic book contains a restriction based on a rating (see Column 15, Lines 43-50) and if the electronic book contains at least one restriction, whether the restriction applies to the identified user (see Column 16, Lines 25-31).

Handelman also discloses restricting access to the electronic book based upon the information (see Column 16, Lines 1-6 for receiving the electronic book only if the user is authorized based on authorization information described above).

Handelman also discloses saving a first restricted version of the electronic book in the library unit including the original format of the electronic book (see Column 17, Lines 27-39 for receiving/storing multiple versions of a single document, which can be restricted (by controlling which portions to display or different versions to display) and unrestricted versions (by displaying all of another version of the document)). Further note that the different versions are restrictive according to the different languages they are presented in. For example, if an English-speaking user receives a French version and the user does not speak French, this is also an example of storing a restricted version (French) as opposed to an unrestricted version (English).

Handelman also discloses creating a second unrestricted version of the electronic book by deleting predetermined content (see again Column 17, Lines 27-39 for a second unrestricted version being created and transmitted to the user (English version of the document or a version displaying all of the portions of the document)).

Handelman also discloses saving the second unrestricted version of the electronic book in the library unit (see again Column 17, Lines 27-39).

Although Handelman teaches receiving the electronic book data to a library unit (see Column 6, Lines 33-44), Handelman fails to teach receiving and updating directory data of the electronic books in a library unit.

Duga discloses receiving and updating directory data of the electronic books in a library unit (see Column 1, Lines 50-65).

At the time the invention was made, it would have been obvious to a person of ordinary skill in the art, to modify the electronic book system, as taught by Handelman, using the electronic book menu updating method, as taught by Duga, for automatically updating a menu after an electronic book is downloaded to a device, as opposed to a user having to manually enter the title of the electronic book every time the user downloads the electronic book to his/her device.

Handelman and Duga both fail to disclose inserting a cross-reference to the second unrestricted version of the electronic book in a header portion of the first restricted version of the electronic book.

Knauff discloses inserting a cross-reference to the second unrestricted version of the electronic book in a header portion of the first restricted version of the electronic book (see Column 16, Lines 41-64 for creating a keyword list in the header portion of the restricted document (document created from the electronic data object (electronic book)) where the list of keywords are taken from the electronic data object and therefore cross-references the unrestricted version of the electronic book/data object).

At the time the invention was made, it would have been obvious to a person of ordinary skill in the art, to modify the electronic document versions, as taught by Handelman and Duga, using the cross-reference data, as taught by Knauff, for the purpose of partitioning the source data object (unrestricted version) into one or more

sections 604, each of the sections being based upon one of the chapters of the book (see Column 13, Lines 14-18 of Knauft).

Handelman, Duga and Knauft fail to teach that the restriction is stored in a header file of the electronic book.

Ginter discloses storing a restriction in the header of a media file (see Figures 65-66 and Column 217, Line 30 through Column 219, Line 40), wherein a media file can be an electronic book (see Column 4, Lines 14-16).

At the time the invention is made, it would have been obvious to a person of ordinary skill in the art, to modify the electronic book header, as taught by Handelman, Duga and Knauft, using the restriction inserted in the header of an electronic book, as taught by Ginter, for the purpose of protecting rights for various participants in electronic commerce and other electronic or electronically-facilitated transactions (see Column 1, Lines 16-20 of Ginter).

Referring to claim 2, Handelman discloses wherein the restricting step includes restricting the access based upon a rating assigned to the electronic book (see Column 15, Lines 49-50 for the authorization information containing ratings information used in determining if the user will be restricted access to the electronic book), wherein the rating can be assigned to the electronic book by a user (see Column 15, Lines 47-50).

Referring to claim 4, Handelman discloses receiving a restriction on selected content from a user, wherein the content includes text of the electronic book (see Column 18, Lines 24-40).

Handelman also discloses receiving a restriction one the selected content from a user, wherein the content includes text or section of an electronic book (see the rejection of claim 1).

Handelman also discloses creating a second unrestricted version of the electronic book by deleting the selected content (see Column 17, Lines 2-36 and Column 18, Lines 24-39).

Referring to claim 6, see the rejection of claim 1.

Referring to claim 7, Handelman discloses permitting viewing of only selected pages of the electronic book (the examiner notes that an electronic book inherently contains multiple pages, therefore if an entire version of an electronic book or a portion thereof is not permitted access at the viewer (see the rejection of claim 4 above), then the system inherently only permits viewing of selected pages of the electronic book).

Referring to claim 8, Handelman discloses permitting viewing of no portion of the electronic book (see Column 16, Lines 18-31 for only accessing the electronic book is authorized, therefore if the user is not authorized, he/she will view no portion of the electronic book).

Referring to claim 9, Handelman discloses permitting unlimited access to the electronic book (see Column 16, Lines 33-36 for storing the document/electronic book on the smart cards memory 395 and Column 16, Line 64 through Column 17, Line 19 for accessing the electronic book from the smart card's memory using the authentication data, therefore, a user can access the electronic book an unlimited amount of times based on if the user is authenticated to access the electronic book stored in the smart card's memory 395).

Referring to claim 10, see the rejection of claims 1 and 4 and further note that Handelman also discloses receiving information relating to access to the electronic book by potential users (see Column 15, Lines 33-50 for the CA document loading unit 350 receiving requests for electronic books) and further relating to content of the electronic book (see Column 15, Lines 43-50 for the request information including various types of content related information of the electronic book).

Referring to claim 17, see the rejection of claim 10.

Referring to claims 25-28, see the rejection of claims 1-4, respectively.

Referring to claim 30, see the rejection of claim 1.

Referring to claims 31-33, see the rejection of claims 7-9, respectively.

Referring to claim 34, see the rejection of claim 10.

Referring to claim 41, see the rejection of claim 10.

Referring to claims 47-48, see the rejection of claims 23-24, respectively.

Claim 3 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Handelman et al. (U.S. Patent 6,298,441) in view of Duga et al. (U.S. Patent No. 6,195,667) in further view of Knauff et al. (U.S. Patent No. 6,654,754) in further view of Ginter et al. (U.S. Patent No. 5,892,900) in further view of Block et al. (U.S. Patent No. 6,675,384).

Referring to claim 3, Handelman, Duga, Knauff and Ginter disclose all of the limitations in claim 1, as well as Handelman teaching that the restricting step includes permitting viewing of text within the electronic book (see Column 2, Lines 39-43), but fails to teach permitting no viewing of images within the electronic book.

Block discloses creating an image mask to block an image from being displayed (see Figure 11 and Column 18, Lines 55 through Column 19, Line 17). Further note that Block clearly teaches that the system can be implemented in an electronic book system (see Column 2, Lines 50-56).

At the time the invention was made, it would have been obvious to a person of ordinary skill in the art, to modify the electronic book viewer, as taught by the combination of Handelman, Duga, Knauff and Ginter, using the masking technology, as taught by Block, for the purpose of providing a substitute program signal instead of the offensive or undesirable portions of a program/book (see Column 2, Lines 19-22 and 50-56 of Block).

Referring to claim 27, see the rejection of claim 3.

Claims 50-51 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huffman et al. (U.S. Patent No. 5,761,681) in view of Duga et al. (U.S. Patent No. 6,195,667) in further view of Handelman et al. (U.S. Patent 6,298,441) in further view of Knauff et al. (U.S. Patent No. 6,654,754) in further view of Ginter et al. (U.S. Patent No. 5,892,900).

Referring to claim 50, Huffman discloses electronically displaying a page of an electronic book on a viewer (see Figure 5) and permitting a user to restrict content of the electronic book (see Figure 37).

Huffman also discloses displaying a screen on a viewer (see Figure 5 for displaying a screen on the electronic book viewer).

Huffman also discloses displaying within the screen a page of an electronic book (see step 450 in Figure 38 for displaying a current page of the electronic book), the page including at least a portion of content of the electronic book (see Column 17, Lines 56-59 for displaying a page which includes a portion of the electronic book).

Huffman also discloses permitting a user to identify at least a portion of the content displayed within the screen (see step 454 in Figure 38 which allows a user to select a portion of the text in the currently displayed page of the electronic book (also note Column 24, Lines 1-2).

Huffman discloses displaying a section within the screen for permitting the user to request restriction of the identified content (see Column 24, Lines 2-13 for requesting

a substitute name in a dialog box display section). The examiner notes that by replacing a name with a new name, restriction to the name is accomplished.

Although Huffman discloses receiving and storing the electronic book in a library unit (see Column 6, Lines 3-8), Huffman fails to disclose indexing the electronic book within an index of the library unit and displaying a screen with the index having the electronic book.

Duga discloses storing and indexing an electronic book in a library unit (see Column 1, Lines 50-65) and displaying a directory having the stored electronic book on a viewer (see Column 1, Lines 61-63).

At the time the invention was made, it would have been obvious to a person of ordinary skill in the art, to modify the electronic book system, as taught by Huffman, using the electronic book menu updating method, as taught by Duga, for automatically updating a menu after an electronic book is downloaded to a device, as opposed to a user having to manually enter the title of the electronic book every time the user downloads the electronic book to his/her device.

Handelman discloses receiving a restriction on selected content from a user, wherein the content includes text of the electronic book (see Column 18, Lines 24-40).

Handelman also discloses saving a first restricted version of the electronic book in the library unit including the original format of the electronic book (see Column 17, Lines 28-36).

Handelman also discloses creating a second unrestricted version of the electronic book by deleting the selected content (see Column 17, Lines 2-36 and Column 18, Lines 24-39).

Handelman also discloses saving the second unrestricted version of the electronic book in the library unit (see Column 17, Lines 27-36).

At the time the invention was made, it would have been obvious to a person of ordinary skill in the art, to modify the electronic book system, as taught by Huffman and Duga, using the multiple version storage and portion restriction functionality, as taught by Handelman, for the purpose of providing a secure access system for electronic books (see Column 1, Lines 11-12 of Handelman).

Huffman, Duga and Handelman fail to disclose inserting a cross-reference to the second unrestricted version of the electronic book in a header portion of the first restricted version of the electronic book.

Knauff discloses inserting a cross-reference to the second unrestricted version of the electronic book in a header portion of the first restricted version of the electronic book (see Column 16, Lines 41-64 for creating a keyword list in the header portion of the restricted document (document created from the electronic data object (electronic book)) where the list of keywords are taken from the electronic data object and therefore cross-references the unrestricted version of the electronic book/data object).

At the time the invention was made, it would have been obvious to a person of ordinary skill in the art, to modify the electronic document versions, as taught by Huffman, Duga and Handelman, using the cross-reference data, as taught by Knauff,

for the purpose of partitioning the source data object (unrestricted version) into one or more sections 604, each of the sections being based upon one of the chapters of the book (see Column 13, Lines 14-18 of Knauft).

Huffman, Handelsman, Duga and Knauff fail to teach that the restriction is stored in a header file of the electronic book.

Ginter discloses storing a restriction in the header of a media file (see Figures 65-66 and Column 217, Line 30 through Column 219, Line 40), wherein a media file can be an electronic book (see Column 4, Lines 14-16).

At the time the invention is made, it would have been obvious to a person of ordinary skill in the art, to modify the electronic book header, as taught by Huffman, Handelsman, Duga and Knauff, using the restriction inserted in the header of an electronic book, as taught by Ginter, for the purpose of protecting rights for various participants in electronic commerce and other electronic or electronically-facilitated transactions (see Column 1, Lines 16-20 of Ginter).

Referring to claim 51, see the rejection of claim 50.

Claim 12-16 and 36-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Handelsman et al. (U.S. Patent 6,298,441) in view of Duga et al. (U.S. Patent No. 6,195,667) in further view of Paepke (U.S. Patent No. 6,249,785) in further view of Walker (U.S. Patent No. 6,279, 017).

Referring to claim 12, see the rejection of claims 1, 4 and 7 for the claim limitations met by Handelman and Duga. Handelman also discloses assigning an access level restriction to a potential user by the use of the CA module disclosed in the rejection of claim 10. The examiner further notes that Handelman and Duga fail to teach assigning ratings to each of the electronic books.

Paepke discloses a viewer assigning ratings to multiple electronic books through a user interface (see Figures 1 and 16-18).

At the time the invention was made, it would have been obvious to a person of ordinary skill in the art to modify the rating assignment process, as taught by Handelman and Duga, using the multiple book rating process, as taught by Paepke, for the purpose of recommending items to a person based upon accurate estimates of a favorable reaction to the recommendation (see Column 2, Lines 13-16 of Paepke).

Handelman, Duga and Paepke fail to teach assigning a time-based restriction to each of the electronic books, wherein each page of the electronic book must be displayed for a predetermined period of time.

Walker discloses assigning a time for each page of an electronic book to be displayed to the user for the assigned amount of time (see Column 16, Lines 41-59).

At the time the invention was made, it would have been obvious to a person of ordinary skill in the art, to modify the restriction assignment process, as taught by Handelman, Duga and Paepke, using the time based restriction, as taught by Walker for the purpose of providing a text enhancement method and apparatus for the presentation of text for improved human reading (see Column 2, Lines 58-60 of Walker).

Referring to claim 13, Paepke further discloses that the assigned ratings are within a range of ranges (see Figure 1 for the ratings being numerical values between 1 and 10).

Referring to claim 14, Paepke further discloses selectively permitting access to the electronic books based upon the ratings within the range of ratings (see Column 8, Lines 32-61 and Figure 18 for recommending/permitting access to the predicted electronic books).

Referring to claim 15, Handelman, Duga, Paepke and Walker fail to teach that a user must enter a password in order to assign ratings, the examiner takes Official Notice that it is well known in the art to only allow a user to assign ratings to content if a password is entered.

At the time the invention was made, it would have been obvious to a person of ordinary skill in the art, to modify the system of Handelman, Duga, Paepke and Walker to only allow user to assign ratings if a password is entered, for the purpose only allowing parents to assign ratings in order block objectionable content from their children.

Referring to claim 16, Paepke further discloses that all users may assign ratings (see Column 8, Lines 32-34), and therefore any user can be considered a default user

as broadly claimed, because only one type of user rating account exists in the system of Paepke.

Referring to claims 36-40, see the rejection of claims 12-16, respectively.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason P. Salce whose telephone number is (571) 272-7301. The examiner can normally be reached on M-F 9am-6pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Miller can be reached on (571) 272-7353. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
